| |
| The establishment of the Council of National Guidance as a provisional government. |
| The convening of a Loya Jirgaa body even the Communists |
| recognize as the ultimate political authority in Afghanistanto |
| approve a new constitution. |
| Comment: The plan is designed primarily to provide a common position |
| for the various resistance groups, with its usefulness in any |
| negotiations with Moscow, at most, a secondary consideration. Because |
| the former government officials who drew it up are realistic and well informed, we believe the plan is an accurate reflection of what the |
| resistanceand most other Afghanswould accept. We doubt that Moscow |
| would give much consideration to a peace settlement that, in effect, |
| simply turns over Afghanistan to the resistance. |
| |
| ONS IN QANDAHAR CITY |
| When On John had a similar |
| Three Qandahar businessmen report that Soviet troops and civilian advisers still rarely venture into Qandahar city and that DRA personnel |
| still restrict their movements largely to the city's center and the |
| network of military posts surrounding the city. But most of the fighting |
| now takes place just outside the city, and one businessman notes that it has been more than a year since he has seen an insurgent carrying a |
| weapon during the day inside the city. |
| |
| <u>Comment</u> : Continued Soviet/DRA control of key points in Qandahar a year after their last major clearing operation indicates a decline in |
| insurgent effectiveness. In 1980 and 1981, it usually took about six |
| months for the insurgents to regain virtual control of the city after a |
| major clearing operation. |
